

After-School Programs Prevent Crime

Research shows that after-school programs reduce crime by offering constructive alternatives to gangs and drugs during the peak hours for juvenile crime.

A priority goal of FIGHT CRIME: INVEST IN KIDS California, an anti-crime organization of over 400 sheriffs, police chiefs, district attorneys and crime survivors, is to ensure access to after-school programs for children and youth of all ages—including high school students—and to ensure successful implementation of Proposition 49.

Violent Juvenile Crime Peaks After School

After-school programs help shut down the “*Prime Time for Juvenile Crime.*”

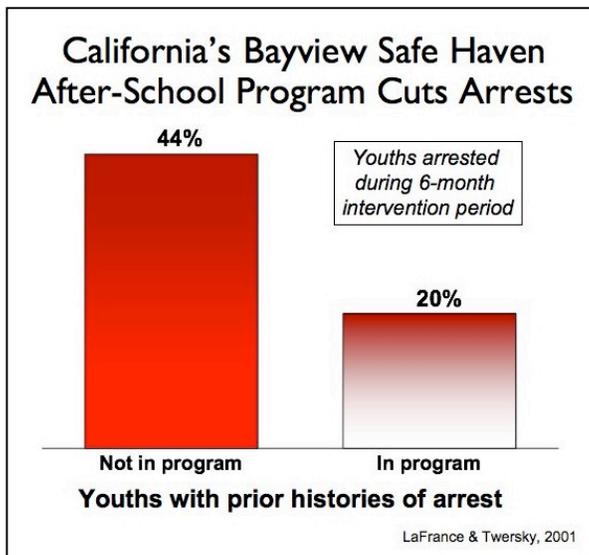

When the school bell rings, turning millions of children and teens out on the street, violent juvenile crime suddenly soars. In California, the peak hours on school days for such crime—and the peak hours for kids to become victims of violence—are from 2 pm to 6 pm.¹ The after-school hours are also the prime time for kids to smoke, drink or use drugs, or be involved in a car crash.²

Evidence Shows That After-School Programs Reduce Crime

- At-risk youth left out of the Bayview Safe Haven after-school program in San Francisco were **two to three times more likely to be arrested** during the six-month initial intervention period than program participants.³

dropped by two-thirds, violent acts and carrying a concealed weapon **fell by more than half**, and arrests were **cut in half**. School discipline, detention, suspensions and expulsions **dropped by a third**.⁴

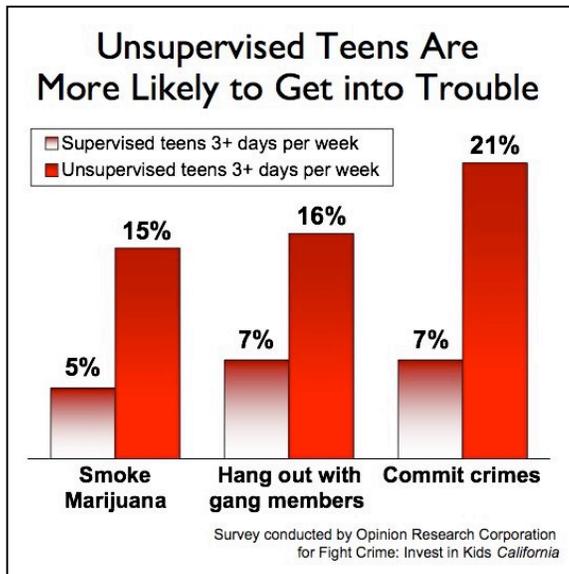

“An after-school program is an extremely powerful anti-crime weapon. California and the federal government must commit the resources to keep teens off the streets during the crucial after-school hours. It’s a matter of public safety.”

Chief William Bratton,
Los Angeles Police Department

- A study of after-school programs in 12 high-risk California communities found that, among kids participating in the programs, vandalism and stealing

- Five housing projects without Boys & Girls Clubs were compared to five receiving new clubs. At the beginning, drug activity and vandalism were the same. But by the time the study ended, the housing projects without the programs had **50 percent more** vandalism and scored **37 percent worse** on drug activity.⁵

- A 2006 survey of over 600 California 12- to 17-year-olds found that kids left unsupervised three or more days per week are **twice as likely** as other kids to hang out with gang members, **three times as likely** to be engaged in criminal behavior, and **three times as likely** to smoke marijuana.⁶

working families are still left unserved by the major state and federal after-school programs.

- Demand for Proposition 49 funding in 2006 far exceeded the supply of new funding. Close to \$200 million in applications had to be turned away.

California Is Headed in the Right Direction

In recent years:

- California voters enacted Proposition 49, which increased funding for the state's After School Education and Safety (ASES) program for elementary and middle school students by over \$400 million, to a total of \$550 million. The new funding became available in 2006-2007 and supports over 3,800 programs and serves hundreds of thousands of students.
- Legislation enacted in 2006 (SB 638) improved ASES by increasing grant sizes and the amount of funding per student. Unlike most education programs, however, ASES does not receive annual cost-of-living adjustments, which in future years is likely to jeopardize program equality.

There Is an Overwhelming Need for After-School Programs

- According to the 2006 survey of California teens, nearly one million—three in 10 California 12- to 17-year-olds—are left unsupervised three or more days per week.⁷
- Even with Proposition 49 in place for elementary and middle school students, hundreds of thousands of students from low-income

- California created the nation's first state-run *high school* after-school program, the 21st Century High School After School Safety and Enrichment for Teens (ASSETs) program, through legislation sponsored by FIGHT CRIME: INVEST IN KIDS *California* in 2002. The program utilizes federal after-school funding. Since 2007, ASSETs funding increased from its initial \$2.5 million level to close to \$80 million, which funds more than 300 individual programs.

"Ensuring that kids have a safe place to go after the school bell rings is not only a way to keep them engaged in school, it is also a smart crime-prevention strategy."

Sheriff Clay Parker, Tehama County

¹ Based on total incidents of violent juvenile crime (where suspect was a juvenile) on school days reported to police for school years September 1999—May 2000 and September 2000—May 2001. FIGHT CRIME: INVEST IN KIDS contacted all 14 cities with populations over 200,000 and obtained this data from Los Angeles, Long Beach, San Diego, and San Jose.
